

Petition to McMaster President Patrick Deane: I Support a Better Mac!

WHEREAS teaching assistants (and research assistants in lieu) need increased funding to fulfill their basic needs, and are demanding expanded mental and physical health and wellness supports, increased paid training, better representation for indigenous members, and improved working conditions; and

WHEREAS postdoctoral fellows need increased wages and benefits to make their lives less precarious, and are demanding recognition of family status and support, support for academic and career development, and the creation of a pension plan; and

WHEREAS the job security and working conditions of our university's teachers, researchers, and postdocs have a direct impact on the learning environment of students; therefore

WE THE UNDERSIGNED support the demands of CUPE 3906 at the bargaining table and call on the McMaster University administration to negotiate a fair deal.

SIGN ME UP!
